

Nirawit Thepsawade (Best)

No.818/421 Room No.B718 The Origin Condo Sukhumvit 105, Bang Na, Bangkok 10260
095-4901028
nirawit.mail@gmail.com

Quality Assurance with 5+ years of experience adept in manual and automated testing across Web, Mobile, API, MySQL, and MongoDB platforms. Specialized in crafting comprehensive test plans for manual teams, with a goal to consistently surpass 95% of test cases in UAT or Dev ENV. Proficient collaborator with developers and project managers, committed to achieving project milestones. Demonstrated track record in error detection, defect resolution, and delivering high-quality software solutions meeting client expectations.

Primary tools: Robot Framework, JEST, Playwright for web, mobile, API automation testing, Apache JMeter for performance/load testing, and Jenkins for CI/CD integration. Experienced with DBeaver and MongoDB Compass for data validation and debugging in MySQL and MongoDB.

PROFESSIONAL EXPERIENCE

Ayodia Company Quality Assurance Lead	Bangkok, Thailand March 2026 – Present
---	--

Pioneered the QA function as the first QA Lead within the organization, establishing structured quality processes, governance, and best practices to elevate overall product quality and team efficiency.

- Led quality assurance efforts across **manual, automation, and performance testing** for web and API-based systems, ensuring high standards of functionality, reliability, and scalability before release.
- Defined and implemented **QA strategies, including test planning, test case design standards, and quality metrics (KPIs)**, to bring consistency and visibility into the testing process across teams.
- Acted as a check-and-balance function within the development lifecycle, proactively **identifying risks, improving requirement clarity, and ensuring quality** is embedded from early stages through production.
- Standardized manual testing practices, including test case structure, test scenario design, and review processes, improving test coverage, traceability, and team collaboration.
- Drove the adoption of test automation, **building frameworks and guiding the team in transitioning from manual-heavy processes** to scalable automated regression testing.
- **Introduced performance testing practices** to identify bottlenecks, optimize system performance, and ensure system stability under load.
- Collaborated closely with Developers and Product Managers in an agile environment to align quality goals with business objectives and deliver high-confidence releases.
- **Improved CI/CD workflows by integrating QA processes** into the pipeline, supporting faster and more reliable deployments.
- Introduced and **leveraged AI tools to enhance testing efficiency**, including test case generation, test data preparation, and exploratory testing support.
- Defined and **tracked QA KPIs** (e.g., defect leakage, test coverage, automation rate, cycle time) to continuously improve team performance and release quality.
- **Led continuous improvement initiatives**, mentoring team members, introducing new tools and methodologies, and fostering a quality-driven culture across the organization.
- **Championed AI adoption within the QA team** to streamline repetitive tasks such as test case generation, test data setup, and documentation, resulting in measurable reduction in manual effort and faster test cycle turnaround.

Fastwork HQ
QA Engineer

Bangkok, Thailand
Nov 2025 – March 2026

Worked as a QA Engineer in an agile cross-functional team consisting of Developers and Product Managers, responsible for ensuring product quality across manual, automation, and performance testing.

- Performed **Manual Testing, Automation Testing, and Performance Testing** for web and API-based systems to ensure functionality, stability, and scalability before release.
- Designed and executed **test cases, test scenarios, and test plans** aligned with product requirements and business flows.
- Developed and maintained **automated test scripts** to support regression testing and reduce repetitive manual efforts.
- Conducted **performance testing** to identify system bottlenecks, response time issues, and stability risks under load.
- Actively participated in **version control workflows**, including code review, merge requests, and resolving conflicts to maintain code quality and release readiness.
- Supported **CI/CD processes**, including merging code, preparing releases, and deploying builds to **production environments** in collaboration with the development team.
- Performed **sanity testing and post-deployment verification** after production releases to ensure critical functionalities worked as expected.
- Collaborated closely with Developers and PMs to clarify requirements, identify risks early, and provide quality feedback throughout the development lifecycle.
- Took ownership of quality assurance in sprint cycles, contributing to continuous improvement of testing processes and release confidence.
- **Key Projects:**
 - Fastwork application and web site
 - Fastwork CMS for Admin

Doppio Tech Co., Ltd.
Senior QA Automation Engineer

Bangkok, Thailand
Apr 2024 - Nov 2025

- Led a team of QA engineers across multiple projects, including 1:1 mentoring, coaching, and knowledge-sharing sessions to support technical growth and professional development.
- Developed and managed comprehensive test strategies, test plans, and test cases for Web, Mobile, and API applications to ensure coverage and adherence to quality standards.
- Designed, implemented, and maintained advanced automated test frameworks and scripts (Jenkins, Selenium WebDriver, Appium, etc.), optimizing test efficiency and reliability.
- Established and enforced coding standards and best practices for automation frameworks, improving maintainability, readability, and long-term project quality.
- Collaborated with developers, product owners, and clients to align testing objectives, clarify requirements, and ensure smooth delivery through effective cross-team communication.
- Integrated automated tests with CI/CD pipelines and implemented root cause analysis for flaky tests and pipeline failures to improve overall test stability.
- Acted as Project Coordinator, managing expectations with stakeholders and resolving blockers early to keep delivery on track.
- Researched and implemented custom automation solutions (e.g., MR Rejected Summary reports, Jenkins pipeline dashboards, Platform Summary reports) to reduce manual workload and enhance visibility for decision-making.

- **Key Projects:**

- **SCG Digital** – Conducted training sessions on **basic web automation** as an instructor, enabling employees to start their automation journey.
- **Gosoft** – Led QA team with responsibilities in **Application, Web, API, and backend testing**, while also managing **team planning and coordination**.
- **CardX (SCBX Group)** – Drove end-to-end **automation coverage** across mobile, web, API, and backend services to ensure scalability and reliability.
- **Nimble KMA app (Krungsri Bank)** – Delivered **automation solutions** for digital banking platforms, focusing on **regression stability and API validation**.

TMBThanachart Bank (ttb bank)

Bangkok, Thailand

Test Engineer

Apr 2023 - Apr 2024

- Led the automation testing efforts for complex projects, overseeing the design and implementation of automated test frameworks and scripts using industry-standard tools such as Selenium WebDriver, and Appium.
- Collaborated with product owners, architects, and developers to understand project requirements and design effective testing strategies, ensuring alignment with business goals and objectives.
- Mentored junior QA team and QA Intern on testing best practices, automation techniques, and tools usage, fostering a culture of continuous learning and skill development within the team.
- Conducted comprehensive manual and automated testing across various platforms including Web, Mobile, and API to ensure the reliability and functionality of software products.
- Developed and executed test plans and test cases tailored to different testing environments, such as UAT and Dev ENV, aiming to exceed 95% coverage and minimize defects.
- Collaborated closely with development teams to integrate automated testing into the CI/CD pipeline, ensuring continuous testing and rapid feedback on code changes.
- Created and maintained documentation including test cases, test reports, and defect logs, facilitating clear communication and tracking of testing progress and results.
- Proactively identified and reported software defects, working closely with developers to investigate root causes and implement timely resolutions.

Doppio Tech Co., Ltd.

Bangkok, Thailand

QA Automation Engineer

June 2022 – June 2023

- Assisted senior QA engineers in manual and automated testing efforts across multiple projects, gaining hands-on experience in testing methodologies and tools.
- Participated in the development of test plans and test cases for Web, Mobile, and API applications, under the guidance of senior team members, to ensure comprehensive test coverage.
- Contributed to the creation and maintenance of automated test scripts using tools such as Selenium WebDriver and Appium, learning to write efficient and reliable automation code.
- Collaborated with cross-functional teams including developers, product managers, and business analysts to understand requirements and ensure alignment on testing priorities and objectives.
- Actively participated in team meetings, knowledge-sharing sessions, and training workshops to enhance technical skills and stay updated on industry best practices in QA and automation.

- Created and maintained documentation including test cases, test reports, and defect logs, facilitating clear communication and tracking of testing progress and results.
- Participated in Agile sprint planning, stand-up meetings, and retrospectives, contributing insights to improve overall software quality and development processes.

EDUCATION

King Mongkut's University of Technology Thonburi

Master of Science Programme in Digital Business (concentration: Digital Business),

Independent Study : Applying Artificial Intelligence to Transcribe and Summarize Audio Files

Honors: cum laude (GPA: 3.40)

Bangkok, Thailand

September 2024

Rajamangala University of Technology Phra Nakhon

Bachelor of Science in Business Administration (concentration: Information Systems),

Honors: cum laude (GPA: 3.20)

Bangkok, Thailand

May 2019

ADDITIONAL SKILLS

- **Programming Languages:** HTML, CSS, Python which are commonly used for writing automation scripts and Custom Library.
- **Version Control Systems:** Experience with version control systems like GitLab, Github, and Bitbucket for managing and tracking changes to code and test scripts.
- **Continuous Integration/Continuous Deployment (CI/CD):** Familiarity with CI/CD pipelines and tools like Jenkins, for automating the build, test, and deployment processes.
- **Performance Testing:** Understanding of performance testing concepts and tools such as JMeter or LoadRunner for evaluating system performance, scalability, and reliability.
- **API Testing:** Experience with API testing tools like Postman, or Swagger for testing RESTful including validation of request and response payloads.
- **Test Management Tools:** Familiarity with test management tools such as TestRail, or Zephyr for organizing test cases, executing test runs, and tracking testing progress.
- **Agile Methodologies:** Understanding of Agile principles and methodologies like Scrum, including participation in Agile ceremonies such as sprint planning, daily stand-ups, and retrospectives.
- **Problem-Solving Skills:** Strong analytical and problem-solving abilities to identify root causes of issues, troubleshoot problems, and propose effective solutions.
- **Communication Skills:** Effective communication skills to collaborate with cross-functional teams, document testing processes, and communicate testing results and findings clearly and concisely.
- **Attention to Detail:** Meticulous attention to detail to ensure thorough testing coverage and accurate reporting of defects and issues.
- **Adaptability:** Ability to adapt to changing requirements, priorities, and environments in fast-paced development cycles.
